

Have you experienced a serious injury or witnessed a fatality at work?

Remember how it made you feel? Remember the effect it had on other people?

If so, you have the power to stop others getting injured or killed at work.

All you have to do, is share your story.

We are **INSPIRED SAFETY EVOLUTION**, and we make quality innovative safety videos based on real life scenarios that tap into a viewer's limbic brain – their emotions.

The videos change the way people behave, and they inspire people to WANT to work safely.

Your story can be one of those videos.

The videos we make will be available to all businesses. We want these videos to get people talking – to bring Safety alive. To make Safety instinct, not choice.

Right now we are developing our first video collection, and you can be part of that. We are looking for stories from people who have worked in the **Manufacturing, Health Care** and **Social Assistance**, and **Construction** industries.

If the incident or injury you were part of had a lasting impact on you and/or those around you, your story has the power to change people's lives.

All you have to do is share it.

**INSPIRED
SAFETY
EVOLUTION**

See. Feel. Believe.

SHARE YOUR STORY

If you're interested in sharing your story, you can get in touch with Chris or Amy to find out more, or visit our website to register.
